

SMK 920/980/990

LCD Keyboard Drawer

Features

- Meets EIA310c & IEC-3 specifications
- Built-in keyboard, touchpad & monitor with high brightness 17" or 19" LCD panel
- Multi-Language keyboard available
- Up to 16 port switch with remote console option
- Compatible with Wintel and Sun systems
- Supports both USB and/or PS/2 interfaces

105-Key keyboard with
2-button touchpad

117-Key SUN keyboard
with 3-button touchpad

D-Sub 15 pin
16 ports with console

Self-locking rails

Introduction

The integration of data, video and voice communication in computers and the subsequent technological advances have spawned many sophisticated CTI applications that have become accessible and affordable to the small and mid-sized business. The increasing CTI applications coupled with the growing demand for corresponding hardware and systems have created a dilemma: How does one pack the growing number of equipment into existing space?

Acme's 1U slim industrial monitor keyboard, the SMK, is the solution for compacting more computing power into limited space. This revolutionary monitor keyboard combines a spectacular display coupled with a keyboard with built-in pointing device in a compact unit that measures only 1U in height. Occupying a fraction of the space of traditional monitor and keyboard units, the installation of the SMK leaves ample space for other critical components. With built-in analog-to-digital conversion board, the SMK can be connected to any standard VGA graphics card for immediate On Screen Display. The monitor key-board unit has a built-in slide rail and mounts easily onto any 19" rackmount cabinet.
